## ANSI / ISEA 107-2004 STANDARD

ANSI stands for American National Standards Institute. Together with ISEA, International Safety Equipment Association developed a standard for high-visibility clothing. They are non-governmental agencies but this particular standard has been adapted by many states. It establishes many details used in the production for high visibility garments. There are 3 classes of apparel involved.

### 3 CLASSES OF APPAREL:

#### CLASS I

Lower visibility requirements in environments where traffic doesn't exceed 25MPH.

Examples of workers in **CLASS I**:

- People retrieving shopping carts from parking lots
- Workers exposed to warehouse equipment traffic
- Parking lot attendants
- Sidewalk maintenance workers

#### CLASS II

Required when worker's attention is distracted from coming traffic and tasks are done where traffic speed is between 25-50MPH.

Also intended for use in work places where greater visibility is required and when inclement weather conditions and complex background is present.

Examples of workers in **CLASS II**:

- Accident site investigators
- Airport baggage handlers
- Airport ground crews
- Cargo loading operators
- Emergency response crews
- Forestry operation workers
- High volume parking crews
- Law enforcement personnel
- Railway operators
- Recycling operators
- Roadway construction workers
- School crossing guards
- Survey teams
- Utility workers
- Waste workers

#### CLASS III

Required where traffic speed exceeds 50 MPH, also where high risk tasks are performed and where the workers must be easily identifiable as a person through a full range of motion at a minimum of 390 meters (1280 feet).

Night crew are especially required.

Examples of workers in **CLASS III**:

- Emergency response crews
- Survey teams
- Utility workers
- Roadway construction workers
